PHI SIGMA SOCIETY

An Organization Devoted to the Promotion of Interest in Research
in the Biological Sciences, Founded Ohio State
University, March 17, 1915.

COUNCIL

Honorary President

Dr. Alexander G. Ruthven (Beta '30)
President of the University of Michigan,
Ann Arbor, Michigan

Chancellor

Dr. Paul B. Sears (Alpha '16), Botany Department,
University of Oklahoma, Norman, Oklahoma

Vice-Chancellor

Dr. Anselm M. Keefe (Zeta '24), St. Norbert College,
West DePere, Wisconsin

Secretary and Editor

Dr. A. I. Ortenburger (Beta '19), Zoology Department,
University of Oklahoma, Norman, Oklahoma

Treasurer

Erwine Hall Stewart (Epsilon '17), Mesa, Colorado

CHAPTER DIRECTORY

(Secretaries)

OHIO STATE

- (Alpha) *(Inactive)* c/o Dr. A. E. Waller, Botany Department, Ohio State University, Columbus, Ohio.

MICHIGAN

- (Beta) Minnie Hilton, Botany Department, University of Michigan, Ann Arbor, Michigan.

NORTH DAKOTA

- (Gamma) *(Inactive)* North Dakota Agricultural College, Agricultural College, North Dakota.

MAINE

- (Delta) Barbara Hunt, 25 Calvin Hall, University of Maine, Orono, Maine.

DENVER

- (Epsilon) Patricia A. Large, 2325 Bellaire Street, Denver, Colorado.

WISCONSIN

- (Zeta) L. T. Wilson, Department of Agricultural Chemistry, University of Wisconsin, Madison, Wisconsin.

AKRON

- (Eta) Dorothy Schneider, 90 Charlotte Street, Akron, Ohio.

MICHIGAN STATE

- (Theta) J. Scales, Department of Bacteriology, Michigan State College, East Lansing, Michigan.

WASHINGTON UNIVERSITY

- (Iota) Ruth Sidebotham, Department of Zoology, Washington University, St. Louis, Missouri.

KANSAS

- (Kappa) Irma Casey, 1101 Vermont Street, Lawrence, Kansas.

MONTANA

- (Lambda) Lyle Bucklin, 325 Van Buren Street, Missoula, Montana.

CALIFORNIA

- (Mu) Mary M. Erickson, 2593 Life Science Building, University of California, Berkeley, California.

WASHINGTON AND JEFFERSON

- (Nu) Alfred G. Alex, 48 South Lincoln St., Washington, Pennsylvania.

NEBRASKA

- (Xi) Marion Williams, 113 Bessey Hall, University of Nebraska, Lincoln, Nebraska.

NORTH DAKOTA

- (Omicron) *(Inactive)* c/o Dr. E. A. Baird, Botany Department, University of North Dakota, Grand Forks, N. D.

EMORY

- (Pi) W. B. Redmond, P. O. Box 534, Emory University, Georgia.

ILLINOIS

(Rho) Viola Michael, 307 S. Orchard St., Urbana, Illinois.

FLORIDA

(Sigma) Raymond Lyle, 1880 W. University Ave., Gainesville, Florida.

DUKE

(Tau) Thomas L. McCulloch, Box 4922, Duke University,
Durham, North Carolina.

MIAMI

(Upsilon) Vivian Van Meter, 36 Wells Hall, Miami University,
Oxford, Ohio.

NEW HAMPSHIRE

(Phi) Eleanor L. Sheehan, Department of Zoology, University
of New Hampshire, Durham, New Hampshire.

MONTANA STATE

(Chi) Gladys Elliott, Lewis Hall, Montana State College,
Bozeman, Montana.

WASHINGTON

(Psi) Helena Werby, Department of Zoology, University of
Washington, Seattle, Washington.

OKLAHOMA

(Omega) Charles Olmsted, Department of Botany, University of
Oklahoma, Norman, Oklahoma.

SOUTHERN CALIFORNIA

(Alpha Alpha) Dorothea Fox, Department of Zoology, University
of Southern California, Los Angeles, California.

MOUNT UNION

(Alpha Beta) Mildred C. Rich, 63 College Street, Alliance, Ohio.

SOUTH DAKOTA

(Alpha Gamma) Ruth Erickson, 320 S. University Street,
Vermillion, South Dakota.

LAWRENCE

(Alpha Delta) Helmi Peltoniemi, Russell Sage Hall, Lawrence
College, Appleton, Wisconsin.

PITTSBURGH

(Alpha Epsilon) C. Ruth Shaw, Department of Zoology, University of
Pittsburgh, Pittsburgh, Pennsylvania.

OKLAHOMA A. and M.

(Alpha Eta) Mr. Whitaker, Department of Entomology, Oklahoma
A. and M. College, Stillwater, Oklahoma.

WILLIAM AND MARY

(Alpha Zeta) Gene Shirley, Station A, Williamsburg, Virginia.

WASHINGTON STATE

(Alpha Theta) Lowell Mullen, Department of Botany, Science Hall,
State College of Washington, Pullman, Washington.

THE BIOLOGIST

December, 1930

Number 2

THE NATIONAL CONVENTION

The Convention this year will be held in Cleveland, Ohio, December 31 (Wednesday) and January 1 (Thursday). Hotel Hollenden, which is headquarters for all the biological sections of the American Association for the Advancement of Science, is also the official headquarters hotel of Phi Sigma. This hotel is on Superior Avenue at East 6th Street.

However, with the exception of the banquet, all meetings of Phi Sigma will be held in Room 6, Main Building, Western Reserve University.

Doctor A. S. Pearse, honorary member of Phi Sigma (Zeta '20), will give the address at the banquet. Doctor Pearse in addition to being head of the Department of Zoology at Duke University, is Managing Editor of *Ecological Abstracts*, and is one of the foremost ecologists and parasitologists of the United States. He will speak on "Research as a Factor in Modern Science and Life."

DELEGATES

Each active chapter of Phi Sigma is entitled to send one delegate to this convention provided that the chapter's financial obligations to the National Treasurer have been completely brought up to date.

The delegate's railroad fare (not including Pullman) will be paid in advance by the National Treasurer but *no other* expenses will be allowed. There will be a banquet given for all

delegates at no expense to them. Dr. A. S. Pearse will speak at this time.

Your delegate upon election should make reservations *at once* at the Hollenden Hotel as all the less expensive rooms are already reserved. The minimum price is now \$4.00. In case a delegate will not be chosen for some time the chapter secretary should make reservation in his own name, later surrendering this in favor of the delegate. A room in another less expensive hotel may, of course, be reserved. Some of the other hotels in Cleveland are: Hotel Statler (1000 rooms), Hotel Winton (500 rooms), Hotel Cleveland (1000 rooms), Allerton, Auditorium, New Amsterdam, Olmsted.

CHAPTER REPORTS

Chapter reports are to be brought to the National Secretary by the delegate. Usually the chapter officers will cooperate in writing this report which is to cover the more important events of the chapter for the past two years, i.e., since the last convention. A financial statement should make up a part of this report.

RAILROAD RATES

The arrangements for reduced railway rates (a fare and a half for the round trip, on the certificate plan) have been made in the name of the American Association for the Advancement of Science, but are to be available to members of any society meeting with the Association at that time. Members of Phi Sigma should secure railway certificates when purchasing tickets to Cleveland, stating that they are to attend the meeting of the American Association for the Advancement of Science. The rates are available from practically all over the United States and Canada. Certificates should be left at the registration room at the time of registration, in order that they may be endorsed by the A.A.A.S., and validated by the railway agent. They will later be returned to their owners and will then entitle the holder to purchase a return ticket at one-half of the regular one-way fare. There is a registration fee of \$2.00 (\$1.00 for members of the A.A.A.S., in good standing.)

CONVENTION BUSINESS

The suggestion has been made that each chapter send in to this office a list of all matters they wish discussed at the business meeting of the Convention. This is the only way we have of knowing your wishes; if your chapter has any desires or opinions to express, please indicate them by the above method. This list should be sent in at once. A summarized list will then be prepared from information received from all chapters and this will be sent back for each chapter's consideration. Each delegate should come instructed as to his chapter's sentiment on these questions *but* be left FREE to vote as he thinks wise *after* hearing the convention discussion.

SCIENTIFIC SESSION

As in former years, the second day (Thursday, January 1) has been reserved for the reading of papers by members of Phi Sigma and also by any other junior research worker who may care to give a paper and who is from an institution not having a Phi Sigma chapter. The Council reserves the right to reject any paper not representing original work in which the author has at least participated. These papers need not be long or profound—just the results of any bit of research a member may have done.

Titles (with abstracts of not over 200 words) should be sent in to this office not later than November 25. This information must be sent into the A.A.A.S. office by November 30! Please make every effort to have your chapter represented not only by a delegate but by at least one paper. Send the *titles* of your papers as soon as possible even though abstracts must come later (before December 1). Abstracts of papers given will be published in the BIOLOGIST Vol. XII, No. 3.

TO RECAPITULATE:

1. Convention.

Cleveland, Dec. 31-Jan. 1.

Headquarters, Hotel Hollenden.

Meetings at Main Building, Room 6, Western Reserve University.

2. Delegates.

One from each chapter if all national financial obligations have been met.

Railroad fare only will be paid and this in advance of trip.

Banquet for delegates gratis.

Reservations for hotel rooms should be made immediately.

Delegate must be present at *all* meetings.

3. Chapter Reports.

To be sent with delegate and to cover last two years.

4. Railroad Rates.

Arrangements have been made for fare and a half rate.

Certificates *must* be obtained *upon payment* of one-way fare to Cleveland.

5. Convention Business.

Send in list of business your chapter wishes discussed at convention at once.

6. Scientific Session.

Thursday, January 1.

Titles of papers to be in this office by November 25.

Abstracts (limited to 200 words) as soon as possible after this—but not later than December 1.

If each chapter will cooperate by following the above suggestions and instructions it will greatly assist the officers who are giving their time to the cause Phi Sigma stands for—encouragement of the spirit of research among young biologists.

A. I. ORTENBURGER,
National Secretary.

THE DIRECTORY

This is the third directory that has been published by Phi Sigma. The first one published in May, 1923, in Volume 5, Number 1 of the *BIOLOGIST*, contained 441 names and listed 8 chapters. The second, issued a year later, was an attempt to complete the first one published. This second directory was a list of 548 names from 10 chapters.

The present directory is of general interest in that it shows a very healthy and regular growth for our organization. Our membership now numbers 3990 (through the school year of 1929-1930) and our chapter roll comprises 32 chapters, only 3 of which are inactive. Your secretary realizes that mere numbers mean little, but a glance through the following list will show many names of which Phi Sigma may justly be proud.

Sincere thanks are due the several chapter secretaries and many others for assisting in bringing up to date information concerning members of their own chapters; this task would have been practically impossible without their assistance.

Realizing perhaps better than anyone else the possibility of mistakes contained in the present directory, I wish to have it understood that I am willing to assume the responsibility for them, except when due to errors on the membership record cards returned to me by the chapters.

A great amount of time has been consumed in the preparation of this list and all possible care has been exercised in its production. The cards have been checked by four people in this office in addition to those checking them at each chapter. Many hours have been spent in checking uncertain addresses, titles, degrees, and so on in such books as the various college and university catalogs, *Membership Directory of the American Association for the Advancement of Science*, *Who's Who in America*, and *American Men of Science*.

It is of interest, I think, that Phi Sigma is represented by alumni members in important positions in 31 foreign countries: Alaska, Australia, Brazil, Canada, Colombia, Cuba, Dutch East Indies, Egypt, England, France, Germany, Hawaii, Holland, Honduras, Hungary, India, Italy, Japan, Mexico, Norway, Palestine, Persia, Philippine Islands, Porto Rico, South Africa, Straits Settlements, Sumatra, Sweden, Switzerland, Turkey and Venezuela.

Most of these foreign members are located in Canada, with 19 in all. Next in order come China with 16, Hawaii and the Philippines with 9 each, and England and Egypt with 7 each.

I wish to urge with all possible emphasis that anyone finding an error or omission or having any additional data for any member, should by all means send it in to me in order that the membership list may be kept correct and up to date in our records.

It has seemed desirable to indicate certain things by the use of symbols and letters. Their meaning is as follows:

*—a member who is starred in *American Men of Science*.

(H)—an honorary member of Phi Sigma.

(N.O.)—a past or present national officer.

†—an address which is probably incorrect, or one which we have been unable to verify.

‡—no address available.

An attempt has been made to give the following information about each member in the order indicated:

1. Name (last, first, middle) in capital letters, followed by married name if any.
- 2. Academic degrees, if any.
3. Chapter name and year.
4. Address, given in italics.
5. Permanent address in certain cases, in parentheses and italics.
6. Field of specialization.
7. Titles, if any.

KEYS

STANDARD SIZE
(Official)

Swivel ring top.....	\$5.50
Stationary ring top	5.00
Mounted as a pin.....	6.25

MINIATURE SIZE
(Small)

Swivel ring top.....	\$5.00
Stationary ring top	4.50
Mounted as a pin.....	5.50

Copies of the **Constitution**. Not less than ten are to be ordered from the National Secretary (A. I. Ortenburger, Norman, Okla.) at a charge of five cents a copy.

Membership Record Blanks. Not less than twenty-five are to be ordered from the National Secretary at a charge of two cents each.

Membership Certificates are issued (no charge) by the National Secretary when the record blanks have been filled out, received, and their contents approved.

When sending initiation fees to the National Treasurer always send the serial number of the person for whom the fee is paid.

Order all keys direct from the L. G. Balfour Co., of Attleboro, Mass., through either the chapter Secretary or Treasurer. Accompany all orders with the name (plainly printed) of the person for whom the key is intended, the chapter to which he belongs and the date of his initiation.

The *PROMI* Microscopic Drawing and Projection Apparatus

Projects microscopic slides and living organisms and insects on table or wall for drawing and demonstration. Also used as a microscope and a microphotographic apparatus.

The Promi, recently perfected by a prominent German microscope works, is an ingenious yet simple apparatus which fills a long felt want in scientific instruction and research in Bacteriology, Botany, Zoology, Pathology, Anatomy, Embryology, Histology, Chemistry, etc.

It has been endorsed by many leading scientists and instructors.

In the Industrial Field, its uses are limitless for research as well as for Microscopic ex-

amination, comparison and recording of raw and partly processed materials. The simple operation of this apparatus permits its use by the layman as well as the scientist.

AS A PROJECTION APPARATUS: It is used for projecting in actual colors on wall or screen, microscopic preparations, living organisms and insects for lecture room demonstration and instruction. Makes it possible for a group of students to examine a single specimen simultaneously. Invaluable for instructors in focusing students attention on important features, which cannot be demonstrated with equal facility and time saving under a microscope. Eliminates the eye strains of microscope examination.

AS A DRAWING LAMP: The illustration shows how a microscopic specimen slide is projected in actual colors on drawing paper enabling student or teacher to draw the image in precise detail in black or colors. Living insects or microscopic living organisms can also be projected. Adjustment of the size of the image is simply a matter of varying the distance to which the image is projected. Higher magnification may be obtained by using tube and ocular and or high power objectives. Charts can readily be made for class room instruction.

AS A MICROSCOPE: By removing the bulb and attaching the reflecting mirror and inverting the apparatus a compound microscope is achieved. Higher magnification is possible by the use of standard microscopic high power objectives and oculars.

AS A MICROPHOTOGRAPHIC APPARATUS: Microscopic preparations of slides, living organisms and insects can be photographed without the use of a camera.

PRICE: F. O. B. New York \$100.00 complete apparatus in polished wood carrying case. Includes extra bulb, rheostat for 110 and 220 volts with cords, plugs and switch for both DC and AC current, 11x objective, tube with 5x ocular, reflecting mirror and micro-cuvette. Extra equipment prices on request.
